

Features & Benefits

The Snap Frame system has a hingeable cover that allows access to change graphics. The frame has provisions for corner keys. It is a fast and easy frame to assemble. It is available in Mill finish and a clear anodized finish.

Answers to FAQ's

- The frame accepts between 1/8" to 1/4" thick media.
- Face material trim size - Deduct 1-3/4" from the frame height & width.
- Visible opening - Deduct 2-1/2" from the frame height and width.
- When ordering SignComp will need to verify if the dimensions are the frame size or graphic
- When cutting the Snap Frame cut the frame and cover together. You can use the spring to hold the pieces together. It is important to use a spacer in between the frame and cover that is the same thickness as the media. This will eliminate any gaping in the corners. After the frame is cut it will require some grinding on the back side of the cover to allow for it to hinge open.
